

Clash of Cultures: Monumental Edition

Intelligent Barbarian Opponent— Solo Variant

Created by: Dan Zielinski / BGG: rent13579 / YouTube: GamezMadeEZ

Christian Marcussen has created the best, streamlined, 4-X nation building game on the market today.

This game deserved not a Deluxe Edition... rather a Monumental Edition!

With each Civilization changing how your opponent, IBO, will play, my hope is to have this masterpiece rewrite history on your tabletop often.

Thanks, Christian!

This solo version requires you to play with all expansion buildings and army units.

However, Leader Cards or Civilization Advancement boards are optional.

Contents

Set-Up	2
Turn Structure	3
Action: Advance	4
Action: Construct	6
Action: Recruit	7
Action: Attack	8
Action: Influence Culture	10
Action: Found City	11
Building a Wonder	12
Other Rules	12
Events	13
Status Phase	14
End Game Scoring	14
Variable Difficulty	14
Summary Sheet	15
Civ Advancements	17
Leader Abilities	22

SET-UP

Set up for a 2-player game.

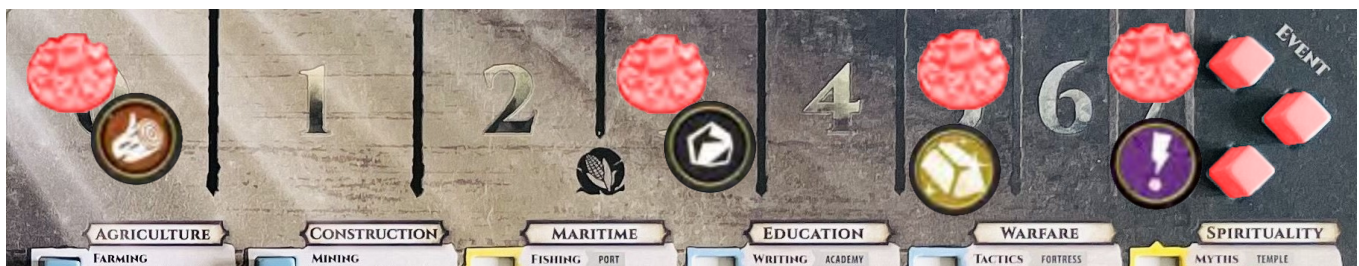

Pick any color to represent IBO (the Intelligent Barbarian Opponent)

IBO will be **RED** in these instructions.

IBO's player board gets set-up slightly differently than yours:

2 sets of resource tokens are needed.

Place a Settlement and the indicated resource token on the 0, 3, 5, and 7 space on the Scale, as seen below.

Above IBO's Scale, create the "City-Track" with the second set of resource tokens. The resource tokens keep track in which order IBO's cities are built and will determine what order to perform some actions.

Deal IBO his starting Action Card, face down.

No Objective Card is given. IBO places cubes in Farming and Mining, as per usual.

If playing with Civilization Advancements (optional)

... see "Civ Board Setup" (Page 17)

If playing with Leader Abilities (optional)

... see "Leader Board Setup" (Page 22)

The usual starting Settlement, Settler and are placed on starting Plains, along with the Food token and 1 Unit.

You are first player.

TURN STRUCTURE

You play your turns as normal.

When it's IBO's turn... Reveal and discard the top Event Card.

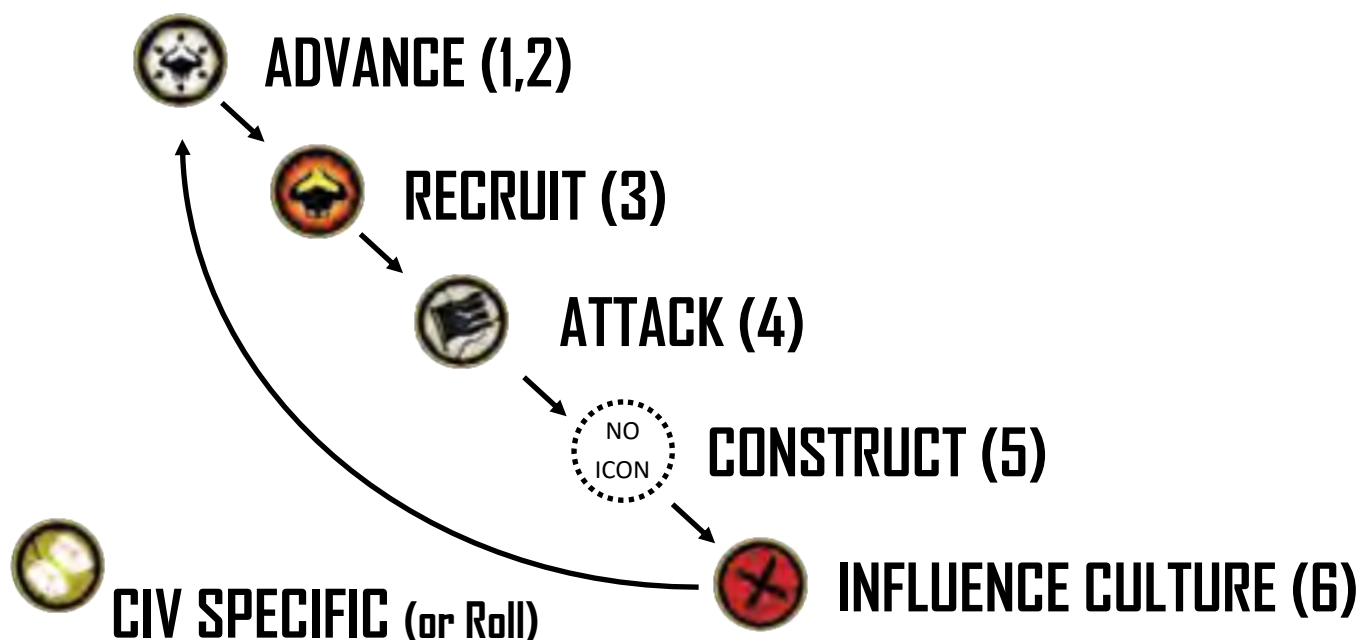

Playing Normal Difficulty...

In Age I and II, IBO performs 1 Card each turn.

In Age III and IV, IBO performs 2 Cards each turn.

In Age V and VI, IBO performs 3 Cards each turn.

The icon appearing (or not) on the card determines his action:

If an action can not be performed, then move to the next action that can be performed.

CIV SPECIFIC: Perform the action listed on bottom of the Civ Advancement board.

If not playing with Civ Advancements, roll a die. The resulting number is the action performed.

:: Standing Tie Rule ::

If, during any action, IBO has a choice between two or more options. Roll a die to determine his choice.

Roll 3 dice.

The die that landed highest (3, in the illustration) is the first value and is read as a d3.

The middle die (6, in the illustration) is the second value and is also read as a d3.

First Value → **2**

Second Value → **3**

Third Value → **3**

Ignored, d2 or d3 (as needed)

Third Values (as needed)

Third Values the first time a Category is full.

Category	First Value	Second Value	Third Value
AGRICULTURE	FARMING Your cities may Collect ☐ from Plains and from Forests	ENGINEERING Immediately draw 1 ☐ May Construct ☐ in cities	SAVANTISM Immediately draw 1 ☐ May Construct ☐ in cities
CONSTRUCTION	MINING Your cities may Collect ☐ from Mountains	SAVANTISM Immediately draw 1 ☐ May Construct ☐ in cities	SAVANTISM Immediately draw 1 ☐ May Construct ☐ in cities
MARITIME	FISHING Your cities may Collect ☐ from one Sea Space	WARSHIPS Cancel 1 "hit" in the 1st round of Naval battles and in Land battles when enemies attack from Ships	CARTOGRAPHY After a Move action where you moved at least 1 Ship, gain 1 (+1 ☐ if Navigation was used)
EDUCATION	WRITING Immediately draw 1 Action Card and 1 Objective Card	FREE EDUCATION After buying an advance using at least 1 ☐ or 1 ☐ May exchange 1 ☐ into 1 ☐	PHILOSOPHY Immediately gain 1 ☐ Gain 1 ☐ after getting a Science advance
WARFARE	TACTICS May Move Army units May use Tactics on Action Cards	STEEL WEAPONS Before Land battle: Pay 1 ☐ to add +2 each combat round or +1 if enemy has Steel Weapons	DRAFT Recruit: A single Infantry may be bought for 1 ☐
SPIRITUALITY	MYTHS May play 1 ☐ to avoid reducing a city's ☐ due to an Event	RITUALS Increase Happiness: Resources may be used in ☐	STATE RELIGION Construct: A temple without paying any ☐
ECONOMY	BARTERING Free Action: Discard a card or 1 ☐ or ☐	TRADE ROUTES Start of turn: Get 1 ☐ per Ship or Settler up to 4 that can gain with a different card ☐ enemy player city within 2 spaces	CURRENCY May get ☐ from Taxation and Trade Routes instead of other resources
TRADITIONS	ARTS Free Action: Pay 1 ☐ to take an Influence Culture action	CIRCUS & SPORTS As an Action: Pay 1 ☐ to gain 1 ☐ or 1 ☐ per city	MONUMENTS Immediately draw 1 ☐ Enemies can't use Influence Culture on your cities with ☐
SCIENCE	MATH Observatory: ☐ Engineering and Roads can be bought at no ☐ cost	ASTRONOMY Navigation and Cartography can be bought at no ☐ cost	MEDICINE After a Recruit Action: Get back 1 spent resource
DEMOCRACY	VOTING Free Action: Pay 1 ☐ to take an Increase Happiness action	SEPARATION OF POWER Enemies can't boost Influence Culture range or rolls vs. your ☐	CIVIL LIBERTIES As an Action: Get 1 ☐ Using Draft costs an extra ☐
AUTOCRACY	NATIONALISM After Recruiting at least 1 Army or Ship: Gain 1 ☐ or 1 ☐	TOTALITARISM Enemies can't boost Influence Culture range or rolls vs. your ☐	ABSOLUTE POWER Pay 1 ☐ to take an extra action
THEOCRACY	DOGMA State Religion: Gain a free Theocracy advance if you are limited to 2 ☐	DEVOTION Enemies can't boost Influence Culture range or rolls vs. your ☐	CONVERSION Influence Culture: Add +1 to your roll and gain 1 ☐ if successful
FORCED LABOR	FORCED LABOR Pay 1 ☐ to have or give ☐ to your cities act as ☐ this turn ☐ only can still only activate once		

The die in the lowest position (4, in the illustration above) is the third value and is only read once the advancement category has been determined and if needed to determine which advancement is learned within the given Category.

Example: The first two dice in the illustration would result in IBO gaining an advancement in Spirituality. It's his first one in the category and thus the third die is ignored because only Myths could be taken.

If 1B0 already had researched Myths, then the third die is a d3 and 1B0 learns the 2nd available skill... Priesthood.

If he had Myths and Priesthood already, then the third die is a d2 and IBO learns the 2nd available skill ... State Religion.

If he had Myths, Priesthood and State Religion already, then the third die is ignored because he could only learn Rituals.

If the dice results in a Category that is full, then a Government Advancement is learned, regardless of which Category is full. If this is the first Government Advancement, then the third die is used to determine which Government is chosen, ignoring prerequisites. From this point on, if IBO attempts to advance in any full category, he will learn a new advancement in the already chosen government. If IBO's government advancement is full, then IBO will not advance and will RECRUIT instead.

Example continuing from above: If IBO had all 4 Spirituality Advancements, then the third die indicates he learns the second government... Autocracy.

(IBD ignores government prerequisites.) If IBD later advances in Spirituality (or any other completed category), then the third die is a d3 and IBD learns the 2nd available skill in Autocracy, Absolute Power

ADVANCE —

After advancing, IBO gains a Culture Token, if earned, and resolve any Events that may occur.

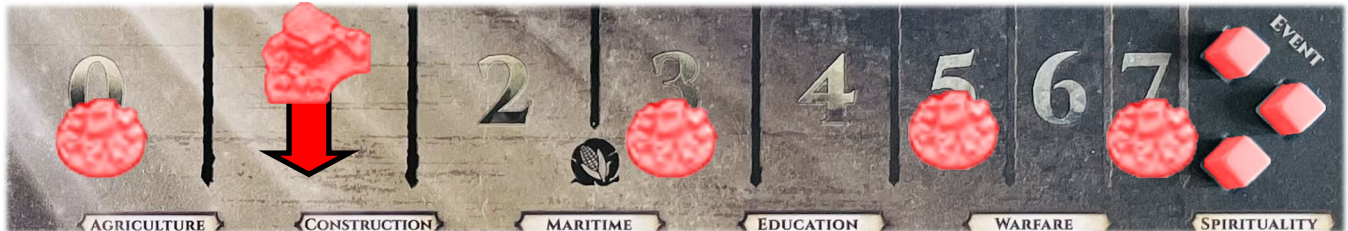

IBO doesn't collect Mood Tokens from Advancements.

(See "Resolving Event Cards")

Finally, place the corresponding City-Piece from the Advancement Category in the lowest available spot, closest to 0 on the Scale.

[Illustration below shows Temple being added after learning Spirituality, from example above.]

If the Scale is full, then no city piece is placed.

If the advancement was in Agriculture, Construction or a Government, even if full, ...

... perform a Wonder Check! (See "Building a Wonder.")

If an advancement qualifies IBO for an Advancement on their Civilization Board, IBO immediately gains that advancement as well.

Advancements' Effect on IBO

Advancements IBO learn will alter his gameplay as follows:

Agriculture: Wonder Check! Also...

...with the 3rd advancement, IBO reveals a Wonder.

Construction: Wonder Check! Also...

...with the 3rd advancement, IBO reveals a Wonder.

Maritime: Each advancement increases "Naval Aggression Range" by 1.

Education: When IBO gets his 3rd and 4th advancements in this category, if IBO can discard an Action Card, he does so to ADVANCE.

Warfare: Each advancement increases "Land Aggression Range" by 1.

Spirituality: When IBO gets his 3rd and 4th advancements in this category, if IBO can discard an Action Card, he does so to INFLUENCE CULTURE.

Economy: When IBO gets his 3rd and 4th advancements in this category, if IBO can discard an Action Card, he does so to CONSTRUCT.

Traditions: For every 2 advancements, IBO gains 1  during the "Change Government?" phase of the Status Phase.

Science: When IBO gets his 3rd and 4th advancements in this category, if IBO can discard an Action Card, he does so to RECRUIT.

Any Government: Wonder Check! Also...

...when IBO gets his 3rd and 4th advancements in this category, if IBO can discard an Action Card, he does so to perform another ACTION this turn.

CONSTRUCT — No Icon

IBO will construct the City-Piece in the left-most position on his Scale in the city with his settler.

If this is a Settlement, then perform a FOUND CITY action. (See "FOUND CITY" p11)

- IBO follows most "City Rules":
- Different City-Pieces: No city may have two of the same City-Piece.
 - Ports must be placed into water hexes.

However, IBO may ignore City-Size Limits: IBO's cities may be bigger than the number of cities he has on the board.

If the left-most City-Piece can not be placed (as it would break City Rules) then skip to the next City-Piece on the Scale. If nothing can be built in the city, then move the settler to the next smallest city in City-Track order and INFLUENCE CULTURE instead.

After any City-Piece is removed from the Scale, shift all City-Pieces remaining left one space. Maintain any gaps between city-pieces.

After shifting city-pieces, move IBO's settler to his smallest, non-👤 city in City-Track order. This may result in the settler returning to the same city.

Example: IBO's Scale currently looks like BEFORE and the settler is in City C (Dre). The Port is the first City-Piece but there isn't a water hex for it. The next city-piece is a Temple, but the city already has one. Thus, IBO builds the Fortress in the city. The remaining City-Pieces are shifted one space left. If the Fortress couldn't be built, then IBO would have FOUND CITY with the Settlement piece that followed.

Each City-Piece provides the following to IBO:

	When Built	On-Going
Port	None	1 Ship with each RECRUIT action
Academy	Take an ADVANCE action	None
Fortress	None	+1 Combat Die and Block, in first round
Temple	Gain 1 🏠	None
Market	None	Possible Calvary/Elephants with RECRUIT actions
Obelisk	None	Can't be Culturally Influenced
Observatory	Gains 1 Action Card	None

Example:

With the construction of the Fortress in City C (Dre), the settler now moves to the smallest non-👤 city following City-Track Order.

City D (Gold) is Angry and not an option.

Since City B (Wood) and City C are the same size, Settler moves to City B as Wood is before Dre in City-Track Order.

RECRUIT --

Each of IBO's cities recruit one unit. If the city can not recruit a unit, due to limits, it does not recruit.

<> Maximum army units per city is Mood altered City-Size. (Max 4)  +1  = 1

<> Recruit in reverse City-Track Order.

<> If city has no Army, recruit . At each city that can accept an additional army unit, roll a die.

If IBO has a Market in any city:  =   =   =  If IBO has no Market:  \  \  = 

 = Spawn  into this city. If already on board, spawn  at 's current location and move  to city.

Spawn  for any figure not available. If no  figures available, city doesn't recruit.

Recruiting Ships

If any city has a Port, one ship is built in a Port Space in reverse City-Track order favoring sea areas that are void of IBO's ships.

:: "Barricade Rule" ::

If one of IBO's enemies (player or pirate) have ships on the Port space, then ships are placed and accumulate in the city (ignoring limits) until the number of ships in the city are equal to or more than the amount of enemy ships in the space.

At that time, all ships are deployed together and a navel battle occurs.

Recruit Example:

Reverse City-Track order means cities will recruit in Ideas, Gold, Ore, Wood, Food order.

Ideas(A): No roll made. The first unit in a city is always an . City is now at max since it's 

Gold(B): Rolls a 

The  is currently in City D.

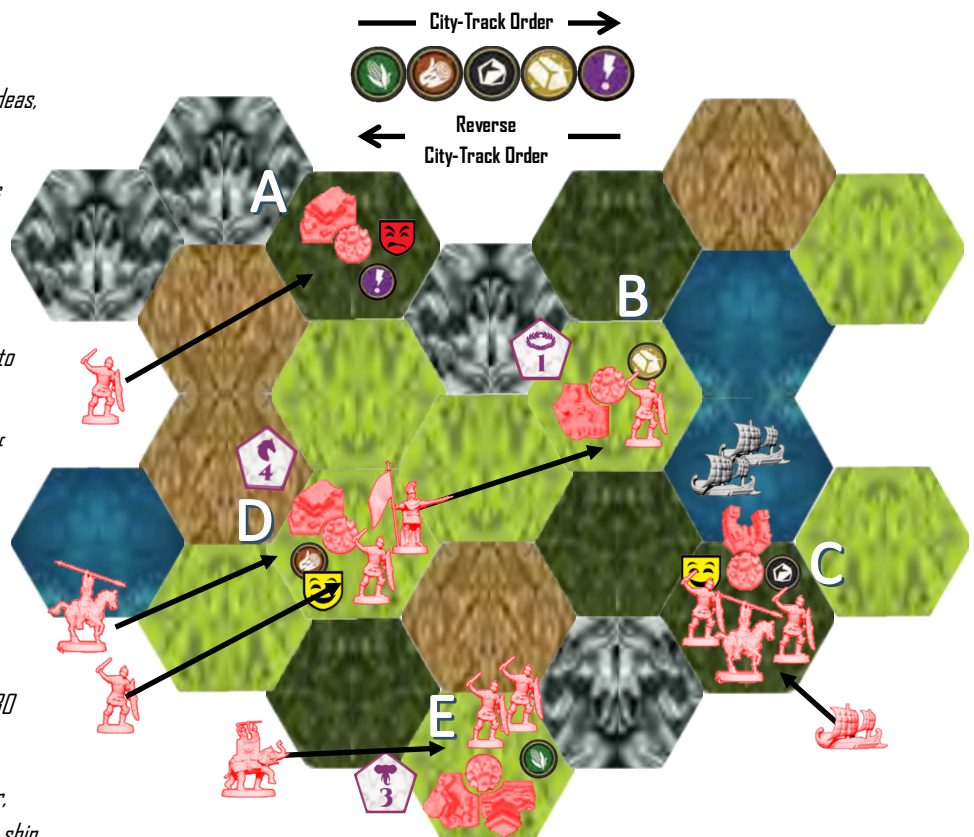

An  will be placed in City D and the  will move to City B.

Ore(C): No roll made. City is already at max number of units for a Size-2 Happy City.

Wood(D): Rolls a . Because at least one city has a Market (B), then a  is recruited and City D is now maxed with 3 units for a Size-2 Happy City. (2  and a )

Food(E): Rolled an   recruited in City E. If IBO had no Markets, an  would be recruited instead.

Then, a ship is recruited at the Port of City C. However, since the port is "barricaded" with 2 pirate ships... the ship is placed in the city. During next RECRUIT action, this city will gain a 2nd ship. Both will then deploy and combat the pirates.

ATTACK --

LAND ATTACK: IBO will first remove all lone settlers within his "Land Aggression Range."

After, IBO will engage the closest City/Army to which he has the highest "Unit Advantage" within his "Land Aggression Range."

IBO's army will "teleport" from one of his 😊 cities to the target, if a clear path can be traced.

:: "Land Aggression Range" ::

Land Aggression Range is 1 + the number of Warfare Advancements learned by IBO.

- <> Water Spaces can only be counted if IBO has at least one ship present in the Sea Area
- <> Can never count through enemy armies/cities.

:: "Unit Advantage" ::

Unit Advantage is determined by subtracting the number of army units in IBO's army by the number of army units in the target army/city.

- <> Your Fortresses count as +1 army unit... in figuring Unit Advantage.
- <> Your Leader counts as (0) army units... in figuring Unit Advantage.
- <> Unit Advantage must be 0 or greater for IBO to attack.

IBO considers targeting Barbarians equally to players.

:: Action Cards ::

IBO will use Action Cards in any combat round that...

... his Unit Advantage is 0 or below.

... or a Leader is present in the battle. (His and/or yours)

When IBO requires an Action Card, simply draw the top card of his Action Card Pile. If the Action Card does not apply to the current battle, then return the card to the bottom of the pile and IBO doesn't use one this round.

If you want to use an Action Card, you must choose which card you are using before revealing IBO's card.

When taking hits, IBO removes Leaders last. Randomly determine which units he removes. If you ever defeat his Leader, take one of his cubes and place it in front of you for 2 🏰 (or see "Leader Abilities" on p22, if playing with them.) If he defeats your Leader, give him the Leader Card.

Retreat?: After each round of battle, recalculated the Unit Advantage. IBO retreats if Unit Advantage is -1 or less.

Retreating units return to their original city.

Success against an Army or Size-1 City!: All surviving units return to their original city and captured city is Razed.

Success against Size-2+ city!: All surviving units are moved into the newly captured city. Replace settlement with the left-most Settlement and token from the Scale. Replace other City-Pieces from the supply first and from Scale (right to left) if need be. City is made 😡.

If capturing his 6th city, then IBO places a 🏰 with the settlement from supply. Add a 🏰 to the end of the City-Track.

If capturing his 7th city, then no token is placed and "no token" is always considered the last in the City-Track.

ATTACK --

If one of IBO's cities is captured, bringing him to below 5 cities, place the Settlement with Resource Marker back on the scale on slot 7 returning any city-piece there back to supply. If at 5+ cities, Settlement goes to supply. If the city with his settler is captured, move the settler to the next smallest non- city in City-Track Order. If, the captured city was , IBO then performs a RECRUIT action.

For each  IBO would receive for capturing cities, defeating Barbarians or Pirates, IBO gets  instead.

If IBO does remove your Settlers but can't attack otherwise, it is considered that he can't attack and moves to CONSTRUCT instead.

NAVAL MOVEMENT/ATTACK

After land battles, check for any possible Naval battles, by assuming all IBO's ships can move their "Naval Aggression Range."

If IBO can cause a naval battle with a Unit Advantage of at least 0, IBO will attack the ship/fleet that he has the greatest Unit Advantage to with all his ships in range. (His ships merge together onto target.)

IBO considers Pirates equally to player ships.

IBO always has and will use "Navigation" as needed.

:: "Naval Aggression Range" ::

1 + the number of Maritime Advancements learned by IBO.

It's the number of spaces his boats will move to engage in combat.

Will use "Navigation."

Combat Example:

IBO's Land Aggression Range is 3 with 2 advancements in Warfare.

IBO's Naval Aggression Range is 2 with 1 advancement in Maritime.

Because IBO has at least 1 ship in Sea Area 1, IBO may count water spaces in it.

Settler E is defeated.

Calculating Targets and Unit Advantage...

City A is a Unit Advantage of +3 but it too far away at Range 4.

City B has Unit Advantage of 0 at Range 2.

(3 units - (2 units + Fortress(1)) = 0)

If no ships were in 1, then no clear path to B.

Barbarian Army C is Unit Advantage +1 at range 3.

(3 units - 2 units = +1)

Army D is Unit Advantage +1 at Range 2.

(3 units - (2 units + Leader(0))) = +1)

Result: IBO will attack Army D because it's closer than Army C and will use Action Cards because your Leader is present.

After land battle, IBO will attack your 2 ships in Sea Area 3 because IBO's right-most 2 ships can "navigate" to Sea Area 3 by moving 2 spaces. (Naval Aggression Range)

Unit Advantage is 0. (2 ships - 2 ships = 0) He will use an Action Card.

INFLUENCE CULTURE --

Determine closest "cheapest" city-pieces.

"Cheapest" city-pieces are city-pieces in your color that would require the least amount of  spent on increasing range to make an attempt. (IBO must have the targeted city-piece type in his supply.)

!!! Remember to enforce your Government or Monuments restrictions, if they apply !!!

As per usual rules, IBO can not Influence Culture from a city that contains your influence.

IBO will target pieces in his own cities if they're among the cheapest and closest targets.

IBO will spend  to increase range far enough, if able.

If range is acquired, an Influence Culture roll is made.

 are spent to increase the resulting roll to a success.

If there aren't enough  to succeed, then none are spent and the attempt failed.

As per usual, IBO may only have one successful Influence Culture in a turn.

Influence Culture Example:

Determining "Cheapest" city-pieces.

Ore(A) is Culturally Influenced by you and thus can't contribute.

Food(B) can Influence at range 3. It can Influence both your Observatory in City 1 and the Fortress in City A at the cost of 0 .

Wood(C) can Influence at range 2. It would need 1  to Influence your Observatory in City 1, Observatory in City 2, the Fortress in City 3 or the Market in City 3.

Result: Following Standard Tie Rules, a die is rolled to determine whether IBO targets the Observatory in 1 or the Fortress in A since they both cost 0  and are the same distance.

If result is Fortress in City A...

IBO rolls:

and spends 4  to make influence successful.

The Fortress is turned Red.

If result is Observatory in City 1 ...

IBO rolls:

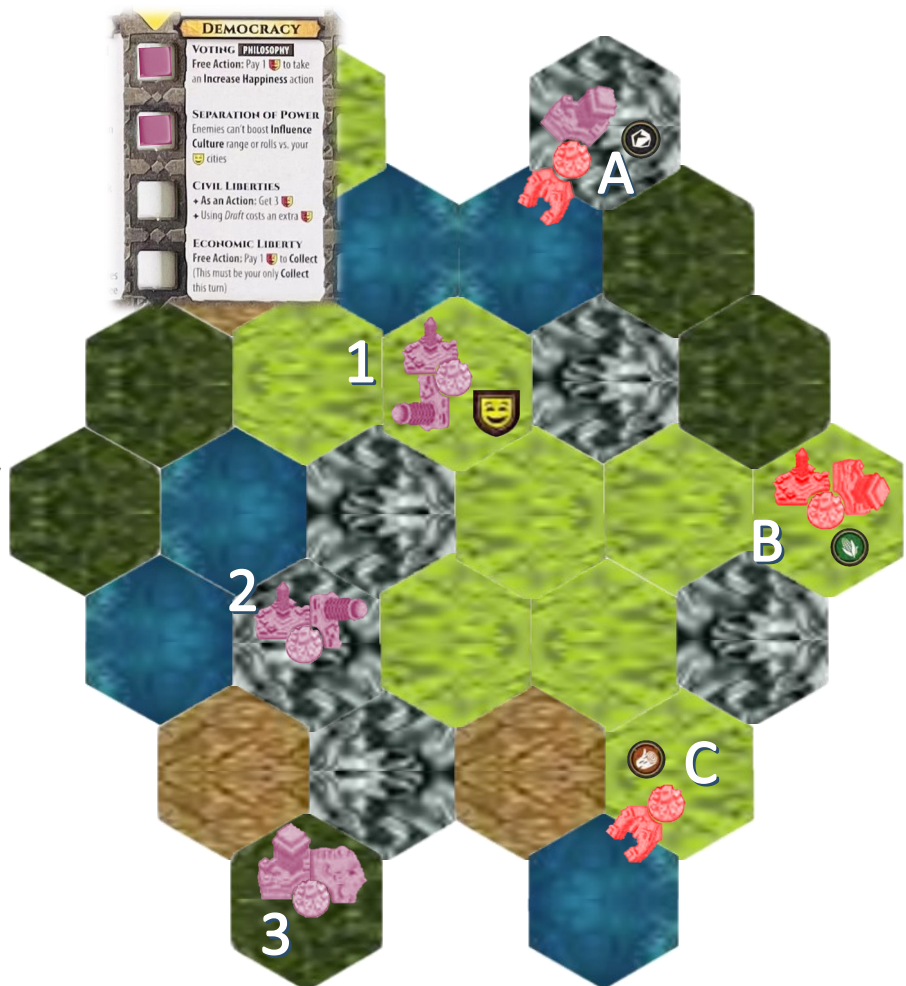

IBO can't spend 2  to make influence successful due to

"Separation of Power" and the city's happiness.

::NOTE::

If all of IBO's cities are under your Influence...
IBO's first city in City-Track Order will target itself without the ability to boost.

FOUND CITY

IBO will not Found a City if he has 5+ cities on the board.

<> If, traced over land, an unexplored sector is adjacent to a sector with one of his cities...

(May trace by sea if IBO has boat in sea area)

- Reveal one of those sectors.
- Follow regular rules for sector placement.
(The random orientation after reveal is kept, unless rule 2 or 3 are broken.)
- Place Settlement in space following City-Track Terrain order

<> If there are no adjacent unexplored sectors...

- Target closest "empty" sector, traced by land, from his cities.
("Empty" means it contains no cities and may include unexplored sectors.)
(May trace by sea if IBO has boat in sea area)
- Place Settlement in space following City-Track Terrain order that is void of all figures.

The left-most Settlement City-Pieces and accompanied token are placed on space along with a single  unit in the city. Shift all city-pieces one space left afterwards and move Settler to smallest non- city in City-Track Order.

Found City Example:

Tracing over land, there are 2 unexplored sectors adjacent to sectors with IBO's cities.

A is inaccessible because water hex B does not contain a ship.

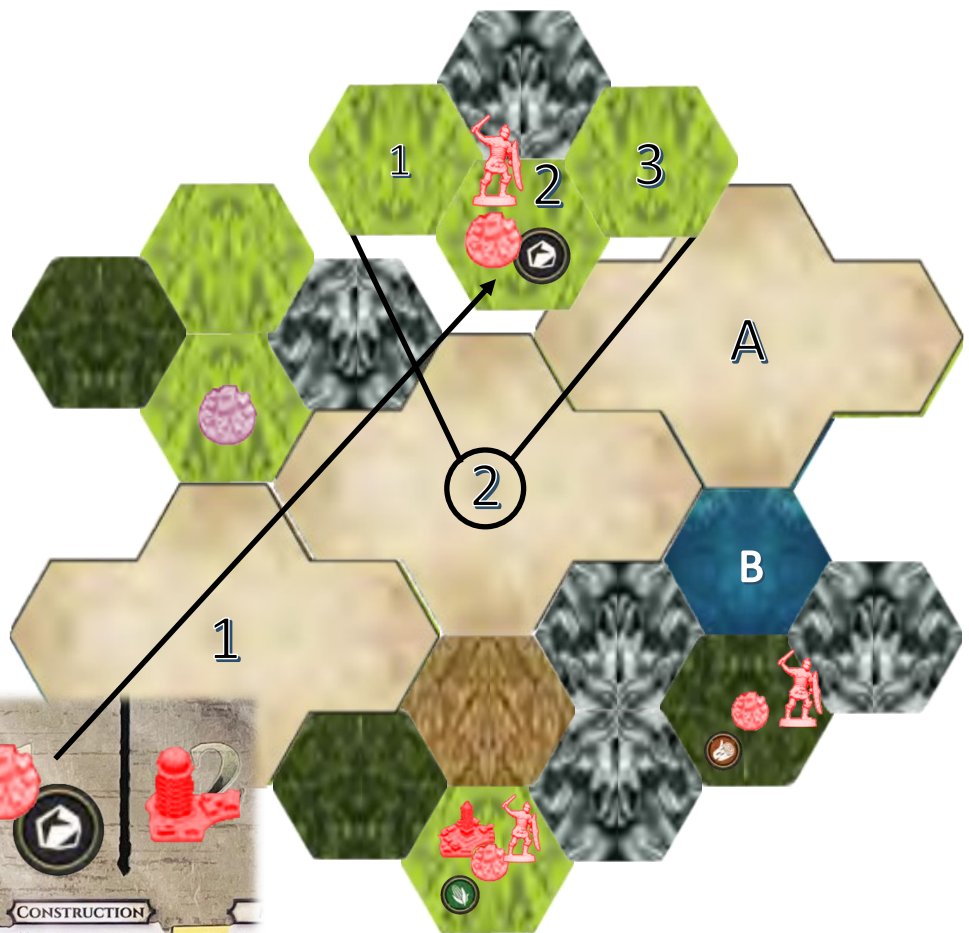

Following "Standard Tie Rules," we assign numbers to the two possible sectors.

As a d2...  IBO explores Sector 2.

With Plains taking priority over Mountains, there are 3 possible spaces for the settlement. We assign numbers to the valid spaces.

A d2...  IBO founds space 2.

Settlement, Infantry and Ore token are all placed on space 2.

If IBO is ever without any cities on the board, IBO can't Found Cities as there are no adjacent sectors to no cities. The game ends during the status phase since he has no cities.

Building a Wonder

"Open Wonders" Variant is active. When you draw a Wonder card, *(from Engineering, for example)* display it beside the map.

Revealed Wonders are available to both the player and IBO to build.

If IBO advanced in Agriculture, Construction or a Government, even if category is full, a check is made to see if IBO builds a Wonder.

<> Does IBO have 3 advancements in Agriculture or Construction?

<> Does IBO has required advancement category unlocked? *[Warfare for Great Wall, for example.]*

<> Does IBO have 5 ?

<> Does IBO have 4 non-settlement City-Pieces on the Scale?

If you answer "Yes" to all of the above, then IBO will build a Wonder he is qualified to build.

4 non-settlement City-Pieces are removed from the Scale (from right to left) and 5  are removed from IBO's pool.

In City-Track Order, IBO will build the wonder in a wonderless  city containing the largest army.

If there are no available cities, then the wonder is not built.

!!! NOTE: The Great Lighthouse must be built in a coastal city but the city doesn't necessary need a Port. !!!

Rule/Card Clarification

<> Action Card: Spies — Draw Objective Cards from the deck equal to half the current Age. (round up)

<> Action Card: Tactical Retreat — If IBO plays this action card, his army is moved off the board. They do not count as killed.

Following the result of the battle, IBO performs a RECRUIT but only with these units that "retreated."

<> Action Card: Tech Exchange — After you pick your advancement, IBO takes an ADVANCE action.

<> Advancement: Steel Weapons — If you have Steel Weapons, you gain +2  if IBO doesn't have Steel Weapons. You gain only +1  if IBO does.

IBO does not gain anything when he attacks with or without Steel Weapons.

<> City Piece: Market — If you have a Market within 2 of IBO's cities and IBO has a Market in any city, gain 1  at the start of every IBO turn.

<> Event Cards: Great [Person] — IBO will always pass them to you where you can keep them for 2 .

He will just discard them if you pass them to him.

<> Event Card: Great Diplomat — If you choose to put this in play, and IBO draws an ATTACK action, IBO will pay the 2  to attack you.

If he can't pay, then you're not considered a target. If you attack IBO before removing this, then you have to pay IBO 2  before attacking.

Events

When an Advancement of IBO's triggers an Event, draw an Event Card.

IBO will only act on the icon of the event. No text of any Event Card effects IBO.

If the text effects you, your part is carried out.

[Example: Ibo draws Population Boom which reads "Place a free Settler in one of your cities. Then select an opponent who also gets to place a free Settler in one of his cities." Result: IBO gets nothing but you gain a settler.]

Barbarians Spawn: You spawn a Barbarian Settlement and Infantry following placement rules from his cities. IBO will then place the additional barbarian unit in a settlement as close to you and as far from his cities as he can. Roll the die to determine which unit is spawned, similar to recruiting with a Market. Leader = Infantry.

Barbarians Move: You move all Barbarian Armies within 2 Land spaces of his cities 1 space toward his cities. You then place the additional barbarian infantry in all barbarian settlements within 2 of IBO's cities.

Pirate Spawn and Raid: You choose the placement of the first Pirate Ship adjacent to one of his cities. He will then place another Pirate Ship in an empty space adjacent to one of your cities and as far from his cities as possible.

If all 4 pirate ships are on board... remove those closest to his cities first.

If at least one Pirate Ship can raid one of his cities, IBO discards a .

Gold Mine: IBO gains 2 .

Exhausted Land: Place the Exhausted Token on the scale with the first non-settlement city-piece. When IBO goes to CONSTRUCT this city-piece, return it to supply and place the exhaust token adjacent to the city with his settler instead.

If no valid city-piece is on scale, discard exhaust token.

Clarifications on your Civilization Advancement/Leaders

<> Advancement (Huns): Raiders — IBO can never FOUND within 2 of your cities, unless within his own "Land Aggression Range."

<> Advancement (Japan): Subterfuge — If you have an Army or City within 2 of an IBO city, you may discard an Action Card to cancel IBO's free actions from discard Action Cards after his 3rd or 4th advance in certain categories. IBO keeps his Action card.

<> Advancement (Vikings): Marauders — When triggered, place one of IBO's cubes on your Civ Board. When placing your third, return them all and remove the right-most non-settlement city-piece from IBO's Scale.

<> Leader (Aztec): Marqzen — Spread Fear will let you remove one unit from an adjacent IBO city. That unit is placed in the next city that can accept it, going in reverse city-track order. Loop back to the end of the city-track, as needed. If unit can not be placed elsewhere, Spread Fear can not be used.

<> Leader (Babylonia): Nebuchadnezzar II — The next time you'd draw a Wonder, find Great Gardens and take it into your hand. IBO can not build it.

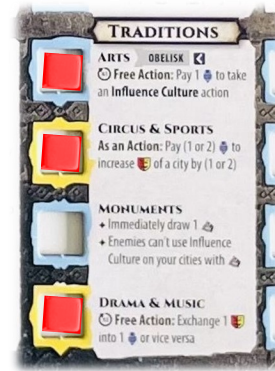

<> Leader (Celt): Viriatus — Terror will let you remove one unit from the attacked IBO city. That unit is placed in the next city that can accept it, going in reverse city-track order. Loop back to the end of the city-track, as needed. If unit can not be placed elsewhere, Terror can not be used.

<> Leader (China): Qin Shi Huang — The next time you'd draw a Wonder, find Great Wall and take it into your hand. IBO can not build it.

Status Phase

IBO performs the following actions during the Status Phase:

<u>Phase</u>	<u>IBO's Action</u>
Completed Objectives	Check Civilization Board for possible action.
Free Advance	Perform an ADVANCE action.
Draw New Cards	IBO gains a face down Action Card.
Raze Size 1 City	Increase all IBO's cities one  level.
Change Government Type	Gains 1  per 2 advancements in Traditions. (IBO would gain one  in this example below.)
Determine First Player	IBO counts  ONLY. You still count both  and  .
	If IBO wins... Roll a die. 1-3 YOU go first 4-6 IBO goes first.

End Game Scoring

At normal difficulty, IBO completes 4 objectives, gaining 8 points. Everything else is scored normally.

(See Variable Difficulty Table for changes to this.)

Variable Difficulty

	AGE I	AGE II	AGE III	AGE IV	AGE V	AGE VI	Objectives Completed
Easy	1 Event Card	1 Event Card	1 Event Card	2 Event Cards	2 Event Cards	3 Event Cards	2
Easier	1 Event Card	1 Event Card	2 Event Cards	2 Event Cards	2 Event Cards	3 Event Cards	3
Normal	1 Event Card	1 Event Card	2 Event Cards	2 Event Cards	3 Event Cards	3 Event Cards	4
Harder	1 Event Card	2 Event Cards	2 Event Card	2 Event Cards	3 Event Cards	3 Event Cards	5
Hard	1 Event Card	2 Event Cards	2 Event Card	3 Event Cards	3 Event Cards	3 Event Cards	6

Shorter Game *If you want to play the shorter game ending in AGE IV:*

After set-up, IBO performs a CONSTRUCT action. He performs 2 ADVANCE actions during the Status Phase and he scores one less Objective at the end of the game.

Summary Sheet

 = CIV SPECIFIC
(or Roll)

On Normal Difficulty:

During Age I and II...
...IBO performs 1 action

During Age III and IV
...IBO performs 2 actions

During Age V and VI
...IBO performs 3 actions

:: Standing Tie Rule ::

If, during any action, IBO has a choice between two or more options...
Roll a die to determine his choice.

Advance:	1	2	3	
Roll 3 Dice	1	1	1	
3rd used to determine advancement in category, if needed.	2	2	2	
	3	3	3	
	Agriculture Wonder Check! 3rd: Reveal Wonder	Education 3rd: ADVANCE 4th: ADVANCE	Economy 3rd: CONSTRUCT 4th: CONSTRUCT	Full Categories = Government Wonder Check! 3rd: EXTRA ACTION 4th: EXTRA ACTION
	Construction Wonder Check! 3rd: Reveal Wonder	Warfare "Land Aggression Range" = 1 + (# of Adv)	Traditions Gain  per 2 Advancements	> Gain  if earned
	Maritime "Naval Aggression Range" = 1 + (# of Adv)	Spirituality 3rd: INFLUENCE CULTURE 4th: INFLUENCE CULTURE	Science 3rd: RECRUIT 4th: RECRUIT	> Add City-Piece to Scale (or Check for Wonder)

Construct:	Port	Ship with RECRUIT	City-Track Order
> Place left-most city-piece in city with settler.	Academy	When Built, ADVANCE	
> Shift city-pieces one space left.	Fortress	+1 Combat Die and Block, 1st round	Reverse City-Track Order
> Move Settler.	Temple	When Built, gain 1 	Move Settler to smallest non-  city in City-Track Order.
	Market	Galvary/Elephants with RECRUIT	
	Obelisk	Can't be Culturally Influenced	
	Observatory	When Built, gain 1 Action Card	

Land Attack:

Defeat all lone settlers.

Then, engage closest City/Army within his "Land Aggression Range" from  cities to which he has the highest "Unit Advantage."

:: "Land Aggression Range" ::

1 + the number of Warfare Advancements

- <> Water Spaces can be counted if ship in the sea area.
- <> Can never count through enemy armies/cities
- <> Consider Barbarian equally

:: "Unit Advantage" ::

Subtract number of army units in IBO's city by the number of army units in the target army/city.

- <> Your Fortresses count as +1 army unit
- <> Your Leader counts as (0) army units

:: Action Cards :: IBO will use Action Cards in any combat round that his Unit Advantage is below 1 or a Leader is present in the battle.

Naval Attack:

(After Land Battles) Assuming all IBO's ships can move their "Naval Aggression Range," if IBO can create a naval battle with a Unit Advantage of at least 0, IBO will attack enemy fleets with all ships in range of target. (His ships merge together onto target.)

IBO will consider Pirates equally. IBO will "Navigation" as needed.

:: "Naval Aggression Range" ::

1 + the number of Maritime Advancements

For each  IBO would receive for capturing cities, defeating Barbarians or Pirates, IBO gets  instead.

Recruit:

In **reverse** city-track Order, recruit 1 unit in each city.

> Max # of Units =
Mood altered City-Size

 +1  =1

If no army in city, Recruit 

If at least one Army unit is in city... roll a die if not at max units.

 Recruit 

 Recruit  or Place  at current location and move 

 If Market in **any** city, Recruit  Otherwise, Recruit 

 If Market in **any** city, Recruit  Otherwise, Recruit 

If **any** city has a Port, one ship is recruited favoring areas void of his ships.

:: "Barricade Rule" ::

Build and accumulate ships **in the city** until the number of ships are equal to or more than the amount of enemy ships on Port.

If one of IBO's  cities gets captured, IBO performs a RECRUIT.

Influence Culture:

Determine "cheapest" city-pieces.

"Cheapest" is a city-piece in your color that would require the least amount of  spent on increasing range to make an attempt.

<> Spend  to increase range far enough.

<> If to succeed,  are spent to increase the resulting roll.

<> One success limit

!!! Remember to enforce your Government or Monuments restrictions !!!

Found City: IBO won't Found with 5+ cities on the board,

Traced over land (or sea w ship in area)...

... if an unexplored sector is adjacent to a sector with one of his cities...

- Reveal one of those sectors.

... if there are no adjacent unexplored sector...

- Target closest "empty" sector.

("Empty" means it contains no cities.)

- Place IBO's Settlement on the preferred terrain that is void of all figures.

- Place  in newly founded city along with resource token.

Building a Wonder: *Open Wonders is in effect. (Wonders are publicly displayed and can be built by anyone.)*

If IBO advances in Agriculture, Construction or a Government, Wonder Check!

<> IBO have 3 advancements in Agriculture or Construction?

<> IBO has required advancement category unlocked?

<> IBO have 5  ?

<> IBO have 4 non-settlement City-Pieces on the Scale?

If "Yes" to all, IBO will build a Wonder!

4 non-settlement City-Pieces are removed from right to left.

5  are removed from IBO's pool.

Following the City-Track, IBO will build the wonder in the wonder-less,

 city with largest army.

Events: *IBO will only act on the icon of the event. No text of any Event Card effects IBO. If the text effects you, your part is carried out.*

 **Barbarians Spawn:** You spawn a Barbarian Settlement and Infantry following placement rules from his cities. IBO will then place the additional barbarian unit in a settlement as close to you and as far from his cities as he can. Roll to determine which unit is spawned. Leader = Infantry.

 **Barbarians Move:** You move all Barbarian Armies within 2 Land spaces of his cities 1 space toward his cities. You then place the additional barbarian infantry in all barbarian settlements within 2 of IBO's cities.

 **Pirate Spawn and Raid:** You choose the placement of the first Pirate Ship adjacent to one of his cities. He will then places another Pirate Ship in an empty space adjacent to one of your cities or as far from his cities as possible. If all 4 pirate ships are on board... remove those closest to his cities first. If at least one Pirate Ship can raid one of his cities, IBO discards a .

 **Gold Mine:** IBO gains 2 .

 **Exhausted Land:** Place the Exhausted Token on the scale with the first non-settlement city-piece. When IBO goes to CONSTRUCT this city-piece, return it to supply and place the token adjacent to the city with his settler instead. If no valid city-piece is on scale, discard token.

Status Phase:

Completed Objectives

Check Civilization Board!

Free Advance

Perform an ADVANCE action.

Draw New Cards

IBO gains a face down Action Card.

Raze Size 1 City

Increase all IBO's cities one  level.

Change Government Type

Gains 1  per 2 advancements in Traditions.

Determine First Player

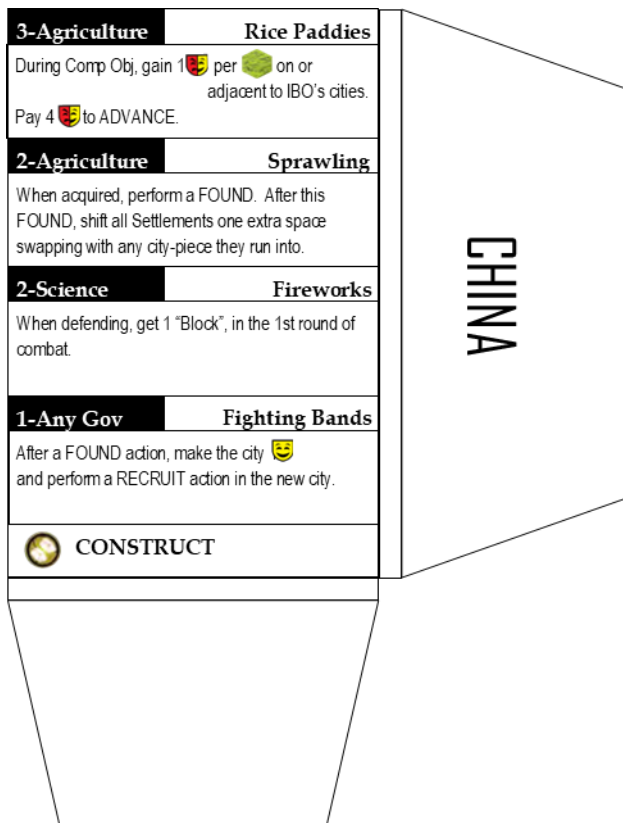

IBO only counts 

If he wins... 1-3 = YOU 4-6 = IBO

	I	II	III	IV	V	VI	#Obj
Easier ↑	1	1	1	2	2	3	2
	1	1	2	2	2	3	3
Normal	1	1	2	2	3	3	4
	1	2	2	2	3	3	5
Harder ↓	1	2	2	3	3	3	6

Civilization Boards

Cut out each Civ Overlay and tape the flaps together in the back.

IBO gains his Civ Advancement when he has cubes equal to the number shown before the category.

"2-Science" means he earns that advancement when he has the 2nd cube in Science.

Civ Tech Variant

When IBO ADVANCEs, instead of rolling for category, simply ADVANCE in the category that is next on his Civ Tech Board from top to bottom. Do this until all Non-Government Advancements are taken.

NOTE: Some Techs are listed out of order.

Example: For China on the left... their first few Advancements in order are:

Agriculture(2), Agriculture(3), Science(1), Science(2),
then Roll for the rest of the game.

1-Warfare	Captives
Up to 4 defeated non-Leader Army units are placed here as Captives. (1/2 each)	
1-Spirituality	Human Sacrifice
Will spent Captives as if need be.

During Comp Obj, if you have a port within 3 of one of his ports, IBO gains 2 .	
ADVANCE	

PHOENICIA

2-Construction	Aqueducts
When acquired, perform an ADVANCE in Agriculture. IBO ignores "Exhausted Land" Events.	
3-Construction	Imperial Roads
Before defending an attack, IBO will move one unit from the closest city to the attacked city. (May exceed City-Limit but not 4.)	
1-Economy	Slave Economy
After CONSTRUCT (not FOUND), IBO gains . Pay 3 and make city to perform CONSTRUCT (not FOUND) again in same city.	
1-Any Gov	Provinces
leaves behind instead of when it moves and captured cities are made instead of .	
CONSTRUCT	

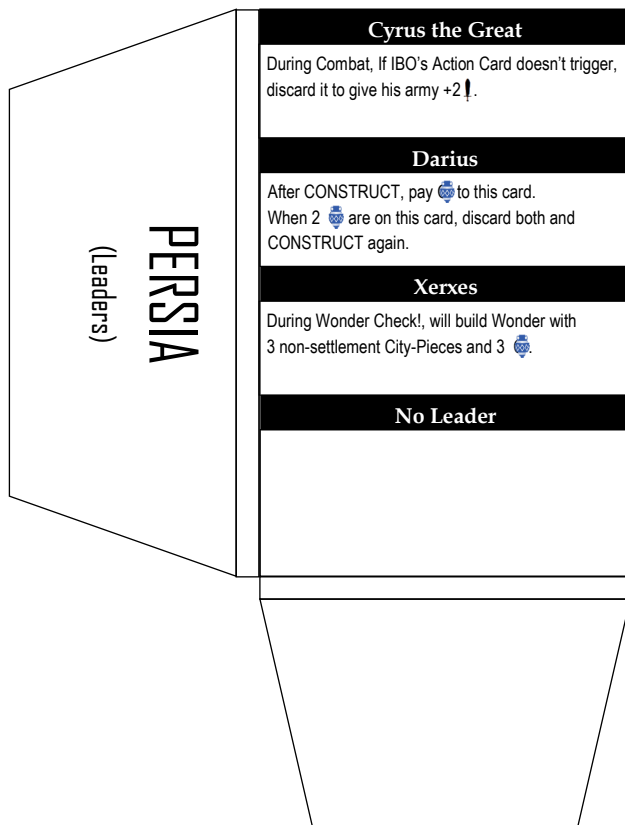

ROME

1-Maritime	Shipcraft
During land ATTACK or FOUND, IBO may count through a single without ships in the sea area.	
2-Maritime	Longships
When acquired, RECRUIT a Ship (if possible) +1 Naval Aggression Range.	
2-Economy	Marauders
During Comp Obj, you lose 1 resource for each of your cities within 2 of IBO's ships.	
2-Spirituality	Runestones
After any battle that IBO loses 2+ units, place 1 on this card. Each is 1 .	
RECRUIT	

VIKINGS

Leader Boards

Cut out each Leader Overlay and tape the flaps together in the back.

Take any random Civ board and keep it facedown. Slide the Leader Overlay over it and place one of IBO's cubes in the "No Leader" position.

When IBO recruits a Leader onto the board, roll a d3 and move the cube to the corresponding leader position.

If IBO's leader is on the map, the corresponding power is in effect regardless of the location of the Leader!

If you defeat his Leader, move IBO's cube back to "No Leader" and then put your color cube into the defeated leader's position. Each cube of yours here is 2 VP. The next time IBO recruits a Leader, roll for 1 of the remaining Leaders available.

AZTECS
(Leaders)

Acamapichtli
After CONSTRUCT, if able, spend 2 Captives to CONSTRUCT again.
Ahuitzotl
When Attacking a city at least 3 spaces away from any IBO city, +1 Block in first round.
Marqzen
When in battle against an army of 3 or more units, enemy gets -1 attack die.
No Leader

BABYLONIA
(Leaders)

Hammurabi
Place a Fortress on the Scale. After a CONSTRUCT, shift all Fortresses one more space left swapping with any piece they bump into.
Nabopolassar
After any of IBO's non-  cities are captured, Perform an RECRUIT. (This does result in 2 RECRUITS if city was )
Nebuchadnezzar II
Reveal Great Garden. You can't build it. IBO can build it without proper category unlocked, 3  , 2+ cubes in Agr or Con, and 2 city-pieces.
No Leader

CARTHAGE
(Leaders)

Hannibal
In the 1st round of combat, you can never gain more than +2  vs IBO's armies.
Hanno
+2  in all Naval battles
Queen Dido
After a FOUND, IBO performs an additional ACTION.
No Leader

CELTS
(Leaders)

Queen Boudica
After a FOUND, shift left-most Settlement two more spaces left swapping with any piece it bumps into.
Vercingetorix
During an ATTACK action, once the battle has been determined, IBO RECRUITS 1 unit into the army that is going to attack.
